## COLUMNS & ACCESSORIES

When you've got a big project, you want to finish it right and make it look awesome!

With Redi-Rock® accessories, you can do exactly that. Accessories include columns, steps, and caps that coordinate perfectly with Redi-Rock retaining and freestanding walls. These blocks are huge, which gives them the stability you need on your project.

"Redi-Rock is so versatile. We were able to use it as steps, freestanding walls, and retaining walls that help tie the park together."

**Doug Goodwin**  
Executive Director  
Kanakuk Kamps

# REDI-ROCK ACCESSORIES PROVIDE:

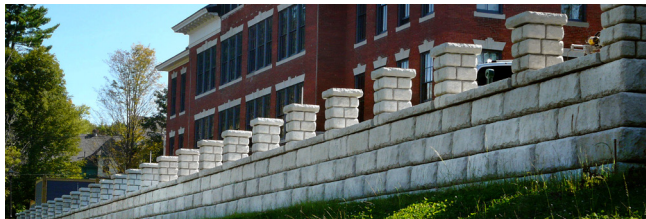

## EASY INSTALLATION

Redi-Rock accessory blocks are massive, which makes them easy to install using an excavator and small crew. The large size of each block also means that your columns, steps, or caps will stay right where you need them.

## FLEXIBLE DESIGN

Column, step, and cap blocks are designed to coordinate with Redi-Rock retaining walls and freestanding walls, giving your project a complete, cohesive solution.

## COORDINATING AESTHETICS

Redi-Rock columns are available in both LedgeStone and Cobblestone. Steps and caps feature a split Limestone texture, ensuring you have a complementary look:

Contact your local manufacturer for texture and color options!

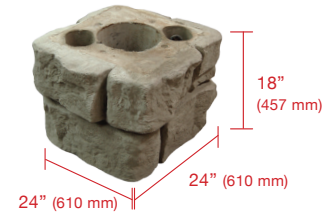

# Complete Wall Solutions

Redi-Rock offers coordinating elements to tie your project together. Here, Redi-Rock freestanding and retaining walls are topped with cap blocks, and Redi-Rock columns and caps are combined with light fixtures to create a custom lighting solution!

LedgeStone

## AVAILABLE ACCESSORIES:

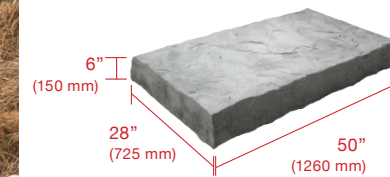

### COLUMNS

**730 pounds (330 kilograms)**

Redi-Rock columns are a great way to finish the top of a Redi-Rock wall, to create a fence or barrier, or to create a sign, post, or gate. These blocks are so big, it only takes

a few of them to make a complete column. Simply prepare your base course, stack the blocks, add a cap, and you're done!

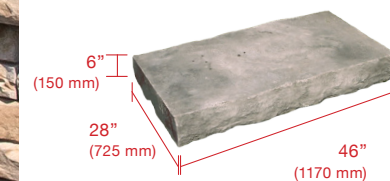

### STEPS

**665 pounds (300 kilograms)**

Redi-Rock steps have the great look of natural stone slabs, but they are safer to walk on and easier to install because they have consistent heights and dimensions.

These step blocks give you the flexibility to build straight or curving staircases.

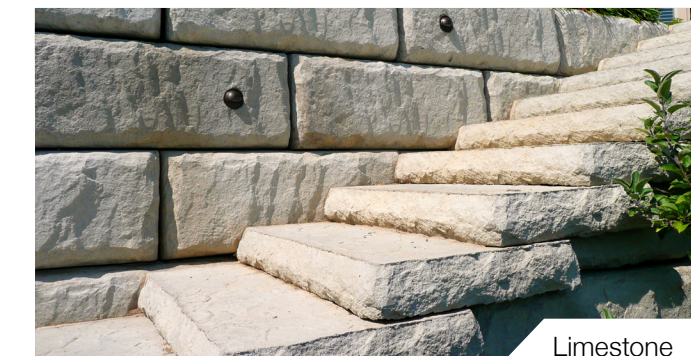

### CAPS

**390-665 pounds (180-300 kilograms)**

Redi-Rock cap blocks are the perfect choice for finishing off a retaining wall, freestanding wall,

or column. These massive concrete blocks are textured on three or more sides to make your project look complete.
