FREESTANDING WALLS

When you're designing a project, the big stuff takes up most of your attention. But that doesn't mean smaller components like barrier walls, landscape walls, and seat walls need to take a backseat!

Redi-Rock® is here to give your project a cohesive solution. With texture on two or three sides, these massive freestanding blocks allow you to build engineered walls for barriers, landscaping, and more. Freestanding walls coordinate perfectly with Redi-Rock retaining walls and accessories, and multiple color and texture options are available to make your project a success.

5.75 square feet of face (0.5 square meters)

FREESTANDING WALLS PROVIDE:

EASY INSTALLATION

Redi-Rock freestanding walls install with the same ease you find with Redi-Rock retaining walls—just use an excavator to stack the blocks on top of each other, like Lego blocks for giants!

CUSTOM OPTIONS

Whether you choose a textured top block, a finishing cap block, or a garden block with a trough for planting flowers, Redi-Rock offers solutions for a coordinated, finished look.

NATURAL BEAUTY

Freestanding blocks are available in multiple textures, using molds made from actual stone:

Ledgestone

Cobblestone

Limestone

Contact your local manufacturer for texture and color options!

Versatile Walls

With Redi-Rock freestanding blocks, it's easy to design above-grade walls with corners or curves. These blocks can be used in conjunction with Redi-Rock retaining walls, columns, steps, or caps to create a custom solution for your project.

YOUR COMPLETE WALL SOLUTION!

The versatility of the Redi-Rock freestanding system allows it to be used in a multitude of applications. Freestanding walls can be used for:

LANDSCAPE WALLS

SIGNS

SEAT WALLS

PRIVACY WALLS

GARDEN/PLANTER WALLS

FORCE PROTECTION

STAIRCASE WALLS

AMPHITHEATER SEATING

... and so much more!
